

EXAMS

Exam AI-901: Microsoft Azure AI Fundamentals (beta)

As a candidate for this Microsoft Certification, you're at the beginning of your career in AI solution development.

For this exam, you should have conceptual knowledge of AI solutions in Azure and the foundational technical skills to work with them. You also need knowledge of Python coding syntax and programming techniques, and you should be familiar with Azure resources.

ⓘ Note

The bullets that follow each of the skills measured are intended to illustrate how we are assessing that skill. Related topics may be covered in the exam.

ⓘ Note

Most questions cover features that are general availability (GA). The exam may contain questions on Preview features if those features are commonly used. You should be familiar with REST APIs, SDKs, and CLIs.

ⓘ Important

The English language version of this exam was updated on April 15, 2026. Review the study guide linked in the "Tip" box for details about the latest changes. If a localized version of this exam is available, it will be updated approximately eight weeks after this date. While Microsoft makes every effort to update localized versions as noted, there may be times when the localized versions of this exam are not updated on this schedule.

Passing score: 700. [Learn more about exam scores.](#)
